

Motorsport Electronics

e-performance is a Race Engineering and Motorsport Consulting with extensive experience in Motorsport. We've been involved on the best and most competitive series all around the world. To mention some:

- e Formula 1
- e WSR 3.5
- e Fia Formula 3
- e FR 2.0 Eurocup
- e Adac F4
- e GT-Open
- e SuperLeague Formula
- e Toyota Racing Series (NZ)

A part from our Race Engineering & Motorsport Consulting activities, at **e-performance** we also work together with our customers to cover diverse demands they could ever have like:

-  [Datalogging & Sensors](#)
-  [Motorsport Communications](#)

Datalogging & Sensors

To success you need to have the tools to understand what is going on. After many years working with different systems, components and platforms we found necessary to give our current and future customers the best electronic equipment to match their needs

We have a wide catalogue of datalogging systems, sensors and motorsport electronic components that fit each individual demands (cost vs functionality vs needs). We represent companies like [AIM](#), [Texys](#), [Te Connectivity](#), [DTA-Fast](#). Feel free to contact us from a single connector to a Professional datalogging system.

Motorsport Communications

Inside our Motorsport Electronics department, we also give support to our customers on the Motorsport communications area. To cover this demands we have different options for different customers needs

-  **E-COMS 1:** Budget Car/Pit communications system
Includes: 1 car radio & full car equipment + 1 Engineer kit with Radio & 1 Button Headsets. (Posibility to add more radio equipment for mehcanic) Ideally for Cup Racing and Amateur.

-  **E-COMS 2:** Professional Car/Pit Digital communications system.
Includes: 1 car radio & full car equipment + 1 Engineer kit with Radio & 2 button Headsets + 1 Mechanic radio kit. Posibilitly to add more radio kits. **E-COMS 2** is the right choice for a Professional Race Team
-  **E-COMS 2PRO:** Includes same equipment like **E-COMS 2** Professional Car/Pit Digital communications system with Truck Repeater + Antenna.
